School of Science Engineering and Technology Skills

Department of Engineering

Subject – DevOps and Automation Lab

Lab Assignment 8

Aim:

Create a Jenkins sample job integrated with GitHub repository.

Objectives:

Jenkins should:

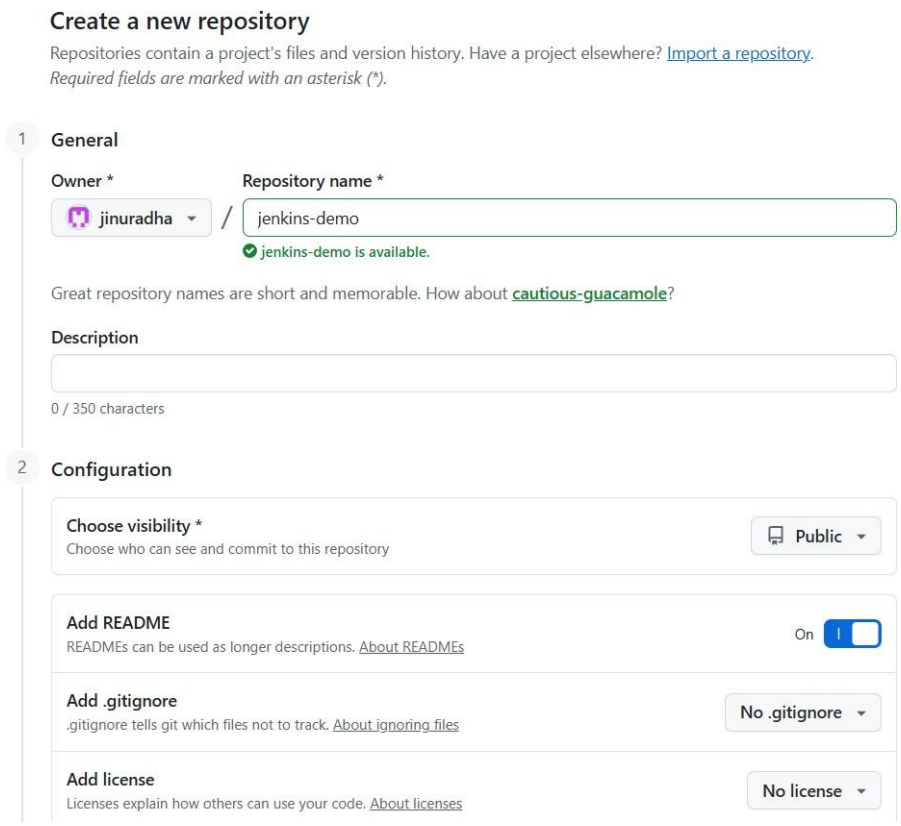
- Pull code from GitHub
- Run a build (simple test command)

Steps:

STEP 1: Create GitHub Repository

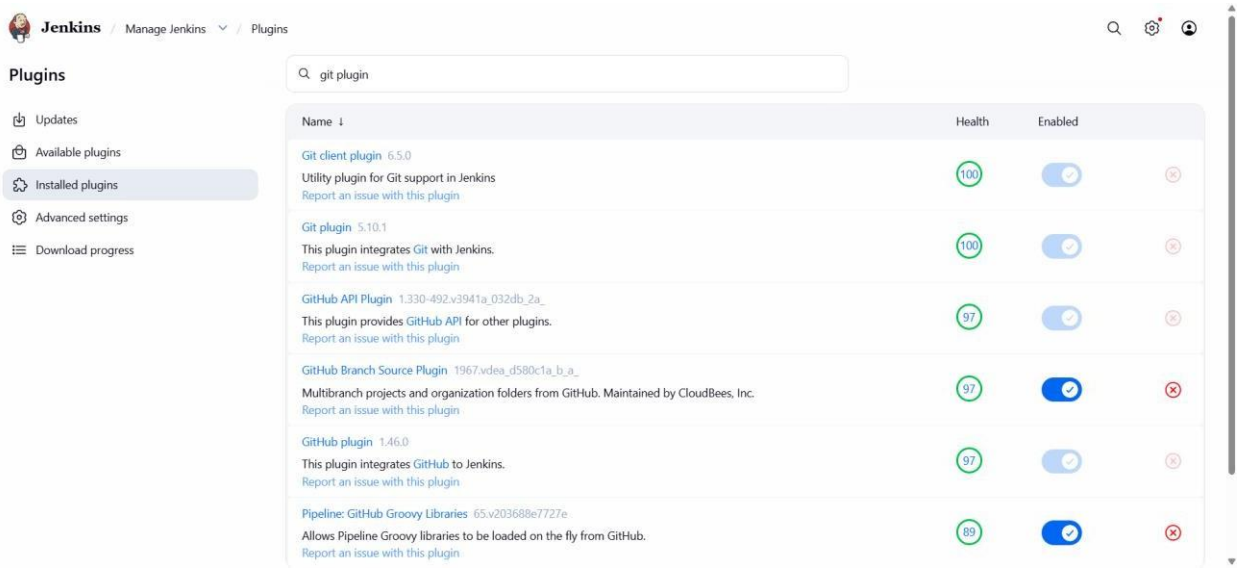
Go to GitHub

1. Click **New Repository**
2. Name it: *jenkins-demo*
3. Add a file: *README.md* and Click Create Repository
4. Copy repository URL: https://github.com/your-username/jenkins-demo.git



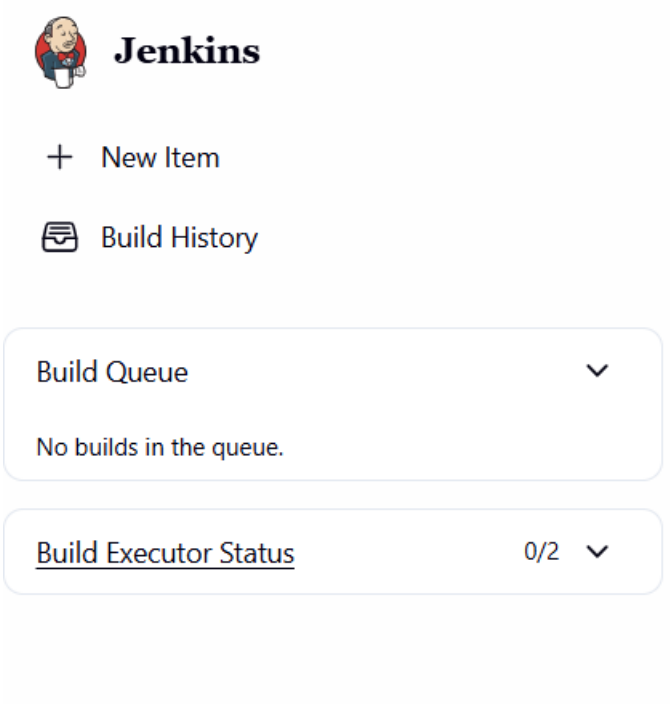
STEP 2: Install Required Jenkins Plugin

1. In Jenkins go to: *Manage Jenkins → Plugins*
2. Search and install: *Git Plugin* (Usually already installed)

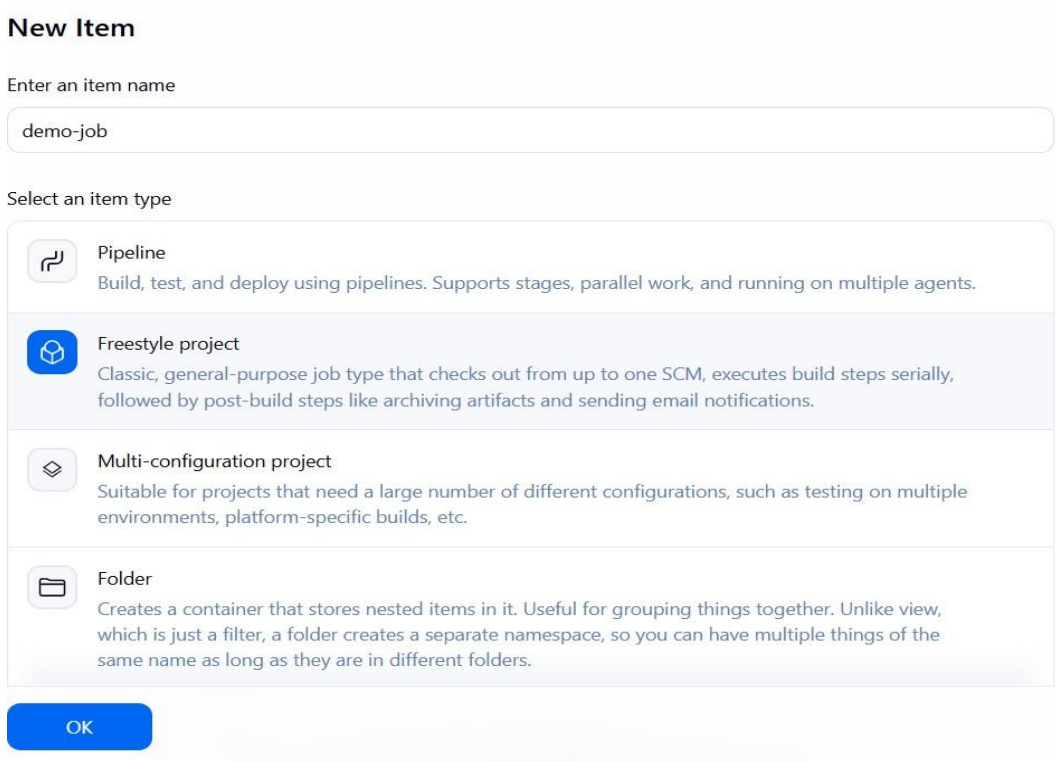


STEP 3: Create Jenkins Job

1. Click **New Item**

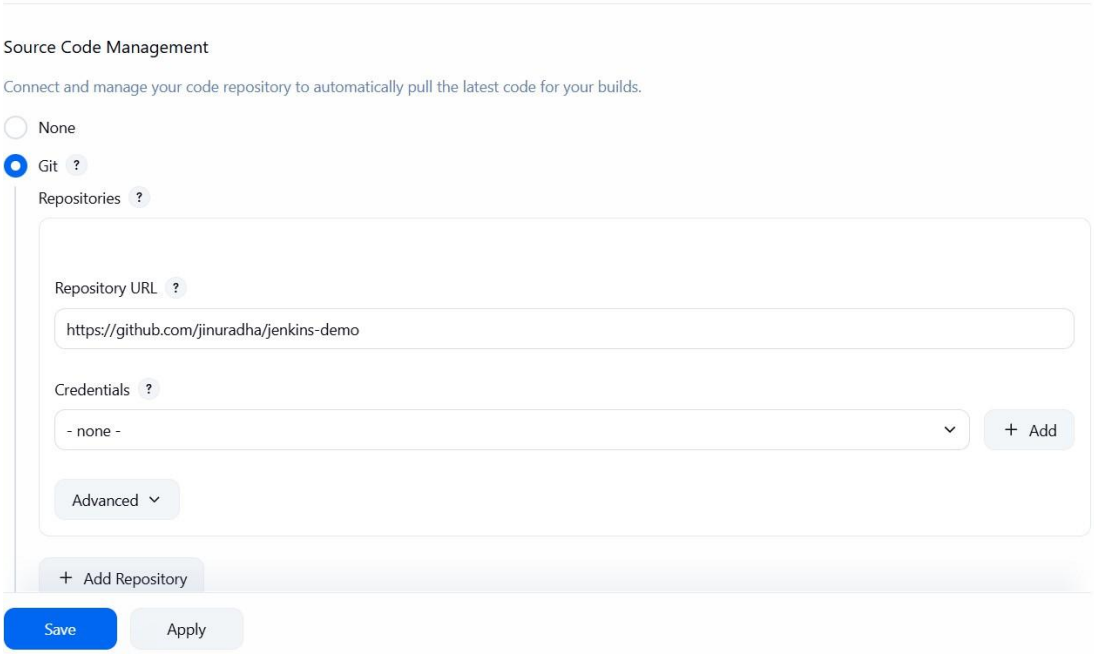


2. Enter name: *demo-job*
3. Select: *Freestyle Project*
4. Click: *OK*



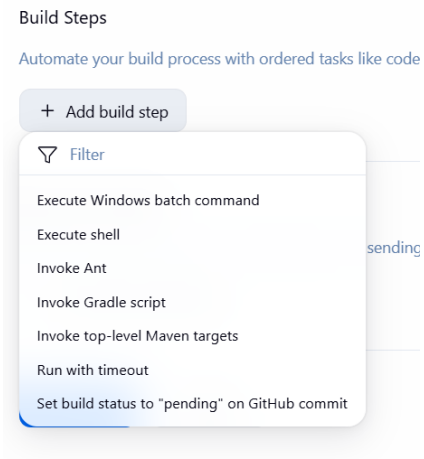
STEP 4: Connect GitHub Repo

1. Inside job configuration: *Source Code Management*
2. Select: *Git*
3. Paste your git repo URL.



STEP 5: Add Build Step

1. Scroll to *Build section*
2. Click: Add *build step → Execute Windows batch command*
3. Add: *echo "Hello from Jenkins + GitHub"*

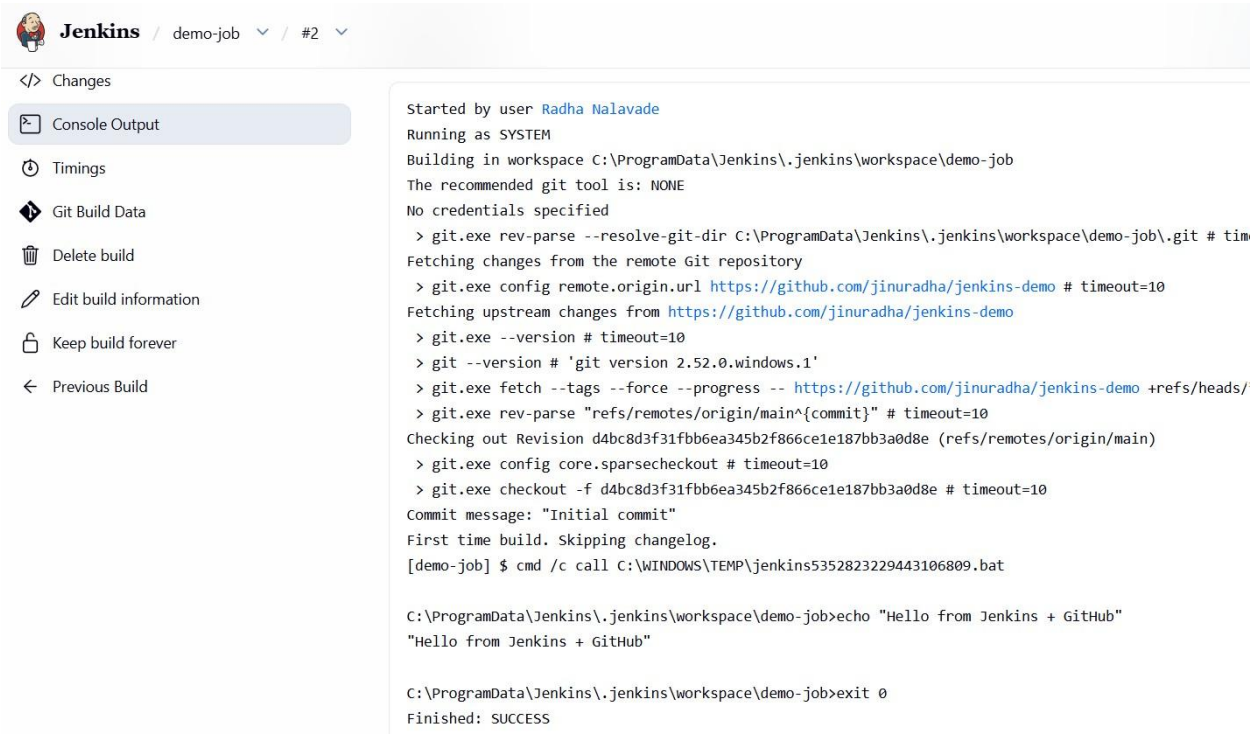


STEP 6: Save Job

Click: *Save*

STEP 7: Run Job

Click: *Build Now*

STEP 8: Check Output


1. Click *build number* (e.g., #1)
2. Click: *Console Output*
